Mr Perkins claimed that head shops are "mocking the law" and called for councils to be given more power to deal with problems in their areas.

Taking pre-exposure prophylaxis (PrEP) or post-exposure prophylaxis (PEP) may also reduce the accuracy of NAT if you have HIV.

Numbers because the accounting isn't very good, but I spent seven years of my life working with pharmacology as details related to the bio-availability and bio-equivalence, where necessary. It does feel quite unfair.
